

Previous Questions:

Question	Answer	Actions for Us
How do we want to show the color answers to the quiz?	NO do not give the answers to the quiz	
Progress bar or countdown, for number of questions <ul style="list-style-type: none"> <li>- Bubbles filling up across the top, progress piechart, rainbows getting filled in               <ul style="list-style-type: none"> <li>o Have it been fun and inviting to look at not just a boring number</li> </ul> </li> </ul>	Whatever works better for us – gradient rainbow color that was used for the house	
When you take the quiz does the questions do we want a back button (move on automatically then have a back button if needed) or continue/next button or lock in/confirm function?	Either a back button or locked in -> whatever is easier to code <ul style="list-style-type: none"> <li>• Probably be easier for a lock or submit for each question instead of a back button</li> </ul>	
For the questions we want to make them random each time, we need to figure out the equation for how we want the questions to be ordered – there is an equation for each person?	Yes, random each time	
Can we get paid for Figma so each type of information can be separate such as games, information, quiz, etc.	They can pay for the Figma pages ->	WE NEED TO DO MORE RESEARCH TO FIND OUT WHAT LEVEL WE WANT

Previous Client Tasks for Us:

SEND FULL COURSES WORK & BASIC HAND OUTS	Come to us in flash drive
--	---------------------------

ICON LIBRARY? FONTS/COLORS/LOGOS	We should have an icon library that has a paid subscription – still need to get back on
THIRD PARTY FOR PAYMENTS? THEY WIL RESEARCH THAT (TELL HER THE ONE WE USE)	3 <sup>rd</sup> party payments – have two in the past try to see what square does – still need to get back on
IDEAS: FOR SILVER AND GOLD (UNLIMITED USERS) BOTH BUT LIMITED ACTIVITIES UNTIL GET TO SOLD IDEAS: BRONZE (ONLY ONE EXTRA ACCOUNT)	Bronze level – Free: 1 person Silver 1.99 to 2.99: 2 people Gold 10.99 a month: unlimited number of people  Educators get the code at a discounted price -> have teachers get gold level at silver level price -> have a discounted price
NAME ONLY TO TAKE QUIZZ /EMAIL HAPPENS WHEN THEY WANT MORE INFO	DO not capture an email before you pay -> you give them a name and then it saves that info, do not get email until you pay
ARE SETTING UP A FREE MILITARY ENTRANCE WITH CODE USAGE	20 set codes, the military team can use it if they want <ul style="list-style-type: none"> <li>- Each code can be used an unlimited number of times is fine</li> <li>- Kind of like life lock</li> <li>- This code is a lifetime -&gt; if military you will never have to pay</li> <li>- We could do a promo code through the payments service; this will be less work for us now</li> </ul>
CAN THE COLOR POP UP AFTER THEY ANSWER????	NO
LIGHT UP ANSWERS TO BRIGHTEN PAGE	NO ANSWERS GIVEN
7 DAYS FREE TRIAL?	Yes, we should do this

Tasks For Shannon/Company:

- Flash Drive
- Icon library: Shannon will look into it and get you answers
- Fonts/logos/colors: Shannon the green is wrong (you gave them orange)

- Third party for payments: Shannon get info
- Need to pay for FIGMA most likely at \$15 per month for 6 month possibly covered for students?
  - A-team is looking into IF THEY CAN get it for free as students
- Need to get questions finalized
- Are they going to tell us what content is going to be important – Callie will help with this
  - We can also categorize -> for how to learn about each color -> they need to categorize the content that we have -> Put what folder/inf is more important
  - They are going to help edit our Figma pages -> will be easier to get the information and layout
  - They can do all page layout -> We can do design later
    - We will help do the page layout

#### Questions:

- Do we need to have the bottom and top nav bar -> Yes

#### Tasks:

- We will work on looking at how to work on backend and learn what IED that we want to use – we will try and get some help for the backend
- Figure out what level of paid Figma that we need

#### Design Inputs

- We cannot use RED at all
  - Find a way to make a gradient of the four colors that we were given
- For design decisions -> we will want to do the three hours fully for this meeting
  - Hopefully have paid Figma by then

#### Regarding the Organization of General Information:

- There will be a page of general information regarding the user's colors
  - Will show user color information and their interaction style
  - They can learn more by accessing the articles in their library
- We will be adding a library of information
  - This library can be accessed on the home page and on the side menu
  - This will require us to create a search feature or an article category feature
    - This will make it easier for users to find articles, especially if we categorize them based on categories that users may be interested in

Regarding the multiple profiles page:

- Clicking on a different profile will log the user in as that user
- Logging in as another user will make the application personalized to their colors
  - This will change all the data stored in the library and in the general information page
- Each profile can see primarily their own information, and then the articles in the library can help them see how they interact with others.
  - I was thinking at the top of one of the articles for interaction with others, we can have buttons that the user can click on that are a shortcut to see their interactions with the colors that correlate with the ones they share a profile with
    - This may get difficult with unlimited accounts but its an idea!

NOW -> they have an owner's manual on how to work with another adult/child of an assorted color -> do not have to worry about what the specific color of the adult/child you can get all the owner's manual
