

What we need from the client:

- What we need from Break for all 16 options from everything from the Home Page from the Client
- They want this information to be in short words and have it be in little bullet points
- Want like career to have more strengths
- We will need to have wording approved at the end of the app being developed

Page Info/Requests:

Create Account Information

- remove username and just store first name
- want to keep track of what the user is here for

Home Page

- Maybe have it so that the user can update what they want “favorited” on the dashboard
- need to look at if all the information look good
- We will need to find new icons to change the homepage screen

Messaging

- Make it so that the user can have different topics that are related to messaging/homepage

Change your color manually

- You need to make sure that you can not have colors that are not able to be clickable
- We can just have more information will be given on the How-To Guide
- We can have a little pop up that can come up and have a explanation as to why you can not pick a certain color -> we will need to be given this explanation
- Can the outline for the introvert/extrovert
- We want to redesign this so that the color
- We will have all 8 different color types listed out and highlighted gray when the color is picked

How-To Guide

- need to get wording for this screen

Launch Page

- need to make a paragraph for the launch page and have it approved

Plan Management

- What is the pricing? -> this will need to be updated
- Bronze = Free
- Silver = \$4.99
- Gold = \$11.99

- We want new names for the levels (we do not want more colors)

Overall Additional Info They Want From Us

- We need to capture if the user is a Government Member with payment information

What we need to do not based on screens

- Word Proofing: We will have to make a master list with all of this information

Payment Plan

- They were utilizing paypal and stripe
- Leah can bring you guys the top 5 picks so we can pick out the information

Messaging & FAQ

- Giving you two plans
- Plan 1: it either directly takes you to your email app that will then input your email
- Before this we would have a questionnaire about what you are using the app for and what other questions you have
- Would be able to schedule coaching sessions through the application through the email -> there would be a specific email that they could send
- Plan 2: FAQ Chat box
- This will be an automated chat bot looking at Amika
- They give a set of FAQ and this could be certain questions and answers
- Info that you are answering after each person
- How it would work
- Category for colors, parenting, relationships, etc.
- Then there would be questions/info that would then be released based on each category
-

Games/Activities

- We need to know the resources asap -> have it be given to us as soon as possible
- Ask Be Do ????
- Situations and then walking them through Ask Be Do
- Conflict Squares
- Building Trust Activity
- Be like a giant working tree like the quiz

Priority:

1. Games/Activities
2. Messaging & FAQ
