Senior Design Bi-Weekly Status Report; Fall 2023

Team Name: sdmay24-09
Team Members: Charlene Baes, Callie Bockart, Jason Kraisser, Leah Wamsley, Samantha Neri, Rachel Schnepf
Report Period: Sept 25-Oct 8

Summary of Progress in this Period
- Meet with our client to discuss the basic designs and layout for app pages:
- Quiz tree – Yes or no questions, multiple attempts, around 25 – 30 questions, statistical bar with answers at the end, and also need to have an introvert / extrovert competent.
- Military options – Code allowing military members to access the highest level at no cost.
- Client comments on design – Main color (white and Purple), secondary colors (neutral tones), Navigations bar (bottom of page and side pull down), quiz specifications.
- Help page – have this underside navigation; it will be a key that defines all the symbols and icons used throughout the application.
- Home Page – On the Home page, we will have all of the profiles under the account on this page. Each profile will have personality information under it as well as a way to click on the profile information.
- Page Layout:
- Have the user prompted to take the quiz.
- Give a disclaimer to the length of the quiz.
- Quiz instruction page
- Take the quiz
- Statistical graphs that show a breakdown of user's answers
- Taken to sign up page/user profile page
- Continue to the app.

Pending Issues
- We need to design information from our client, such as fonts, colors, icons, and main images for the applications.
- Get all the information to help write out app information, such as main website information, pamphlets, and handouts.
- Look at what third-party payment service we want to utilize based on the current payment service that is being used
- Use Figma Premium for design -> Does the client want us to pay for it
- All of the quiz questions that the user will go through to figure out what color/personality type they identify as

Plans for the Upcoming Reporting Period
- Look up third-party access for the payment portion of the app
- Decide on the software for the backend portion of the app
- Continue to design Figma pages to be approved by the client
- Combining the approved traits from the existing pages into one design
- Begin to introduce ourselves to react (language for the project)
